

Rebix (RBX) White Paper

Revolutionizing Community Engagement and Token Utility

Version 1.0

Abstract

Rebix (RBX) is a community-driven token built on the Solana blockchain to deliver fast, secure, and scalable solutions. Designed to empower users, RBX integrates decentralized finance (DeFi), community incentives, and a multichain ecosystem.

Introduction

The blockchain industry is rapidly evolving, demanding innovative solutions that prioritize scalability, affordability, and community participation. Rebix (RBX) addresses these challenges by leveraging Solana's high-speed network, low fees, and robust ecosystem to deliver exceptional value to token holders.

Vision

Our vision is to build a sustainable ecosystem that rewards active participants, promotes decentralized governance, and facilitates seamless adoption of blockchain technology across various industries.

Mission

- Foster a thriving community driven by shared values and incentives.
- Enable seamless integration with decentralized exchanges and platforms.
- Utilize Solana's low-cost infrastructure for scalable growth.

Why Solana?

- **Speed:** 65,000+ transactions per second.
 - **Affordability:** Near-zero transaction fees.
 - **Developer-Friendly:** A growing ecosystem with wallets like Phantom and DEXs like Raydium.
-

Tokenomics

- **Total Supply:** 1,000,000,000 RBX

Allocation:

- Community and Ecosystem: 400,000,000 RBX (40%)
- Liquidity and Listings: 200,000,000 RBX (20%)
- Team and Advisors: 150,000,000 RBX (15%)
- Treasury/Reserve: 100,000,000 RBX (10%)
- Private Presale: 100,000,000 RBX (10%)
- Rewards and Burn: 50,000,000 RBX (5%)

Tax and Burning Mechanism

- **Transaction Tax:** 2%
 - 1% goes to the community wallet for rewards.
 - 1% is burned to reduce total supply and create scarcity.
 - **Manual Burning:** Tokens can be manually burned to adjust supply as needed.
-

Presale Details

- **Type:** Private Presale
- **Soft Cap:** 500 SOL
- **Hard Cap:** 1,000 SOL
- **Presale Price:** 1 RBX = 0.0005 SOL
- **Minimum Investment:** 0.05 SOL
- **Maximum Investment:** 5 SOL

Allocation of Presale Funds:

- 50% for liquidity (to be locked on Raydium or Serum).
- 30% for development and marketing.
- 20% for reserve.

Public Listing:

- Token Generation Event (TGE) and public listing are scheduled for **Q1 2025**.
 - Listing Price: 1 RBX = 0.001 SOL
-

Airdrop Allocation

- **Total Allocation:** 100,000,000 RBX
 - **Recipients:** 10,000 wallets (10,000 RBX each).
 - **Objective:** Drive engagement and incentivize early adopters.
-

Roadmap

Phase 1: Planning and Development (Q1 2025)

- Finalize tokenomics and white paper.
- Develop RBX token on Solana.
- Launch official website and social media channels.

Phase 2: Presale and Airdrop (Q1 2025)

- Conduct private presale on Solanium or Raydium.
- Distribute airdrops to early community members.

Phase 3: Launch and Expansion (Q1 2025)

- List RBX on Raydium and Serum DEXs.
- Launch community engagement programs.
- Begin development of multichain wallet.

Phase 4: Ecosystem Growth (Q2-Q4 2025)

- Introduce staking and rewards programs.
- Collaborate with other Solana projects for ecosystem integration.
- Explore cross-chain compatibility with Ethereum and BNB Chain.

Utility and Use Cases

1. **Community Engagement:** RBX powers community rewards, incentivizing participation in governance, development, and promotions.
2. **Governance:** RBX holders can vote on protocol upgrades, ecosystem initiatives, and treasury allocation.
3. **DeFi Integration:** RBX will be used for staking, yield farming, and liquidity pools on Solana-based DEXs.
4. **Rewards System:** Active participants in the ecosystem will earn RBX tokens through various activities.

Team and Advisors

The Rebix team consists of blockchain enthusiasts, developers, and community managers committed to delivering a robust and transparent ecosystem.
